[Ecoslay – An Anthology]

Release: 10/2025 ~ 13x17cm ~ 135 pages ~ suggested price €20.- ~ 2nd edition

Ecoslay is a movement - and a method - to absorb intersectional environmentalism into popular culture and to rethink the way we communicate ecological and social crises.

And what better way to infiltrate the mainstream than through the seductive yet ambiguous figure of the Girl? In this first publication, eight artists, researchers, and cultural workers provide their interpretation of Ecoslay through girlhood as a cultural force for environmental action.

An Introduction to *Ecoslay*
Camille Belmin

Disaster after disaster, headline after headline covering billionaires shattering our last bits of humanity, democracy and burning *our planet away*. aren't we are all so exhausted from scrolling through our times? Day after day, catastrophic news are delivered to us, foreshadowing and revealing socio-ecological mutli-crises and crumbling worlds.

Numbness, denial, depression, and anxiety. This is what they want. They want you to feel numb. We refuse that. Instead of despairing and looking away, we believe that it's high time for a little makeover of the environmental movement, with style and confidence, to slay our way out of despair and numbness.

Why is ecology being communicated with always the same green-brown-and-beige earthy aesthetic, and either with an apocalyptic discourse or going-back-to-the-land fantasies narrative? Why aren't popular culture icons massively calling out these issues? What is more powerful than the excitement of a stadium of Swifties in trance?

This collaborative publication introduces *Ecoslay*, a new perspective that rethinks environmental communication through the lens of popular culture. In this edition, we start with a case study and focus on the culture of girlhood as a vector of environmental communication. It includes contributions by 8 artists, researchers, and cultural workers who provide their interpretation of *Ecoslay*.
